

# We're giving away free data workshops

Unlock the power of your data today with our comprehensive data solutions tailored to your business needs. We're an award-winning data consultancy.

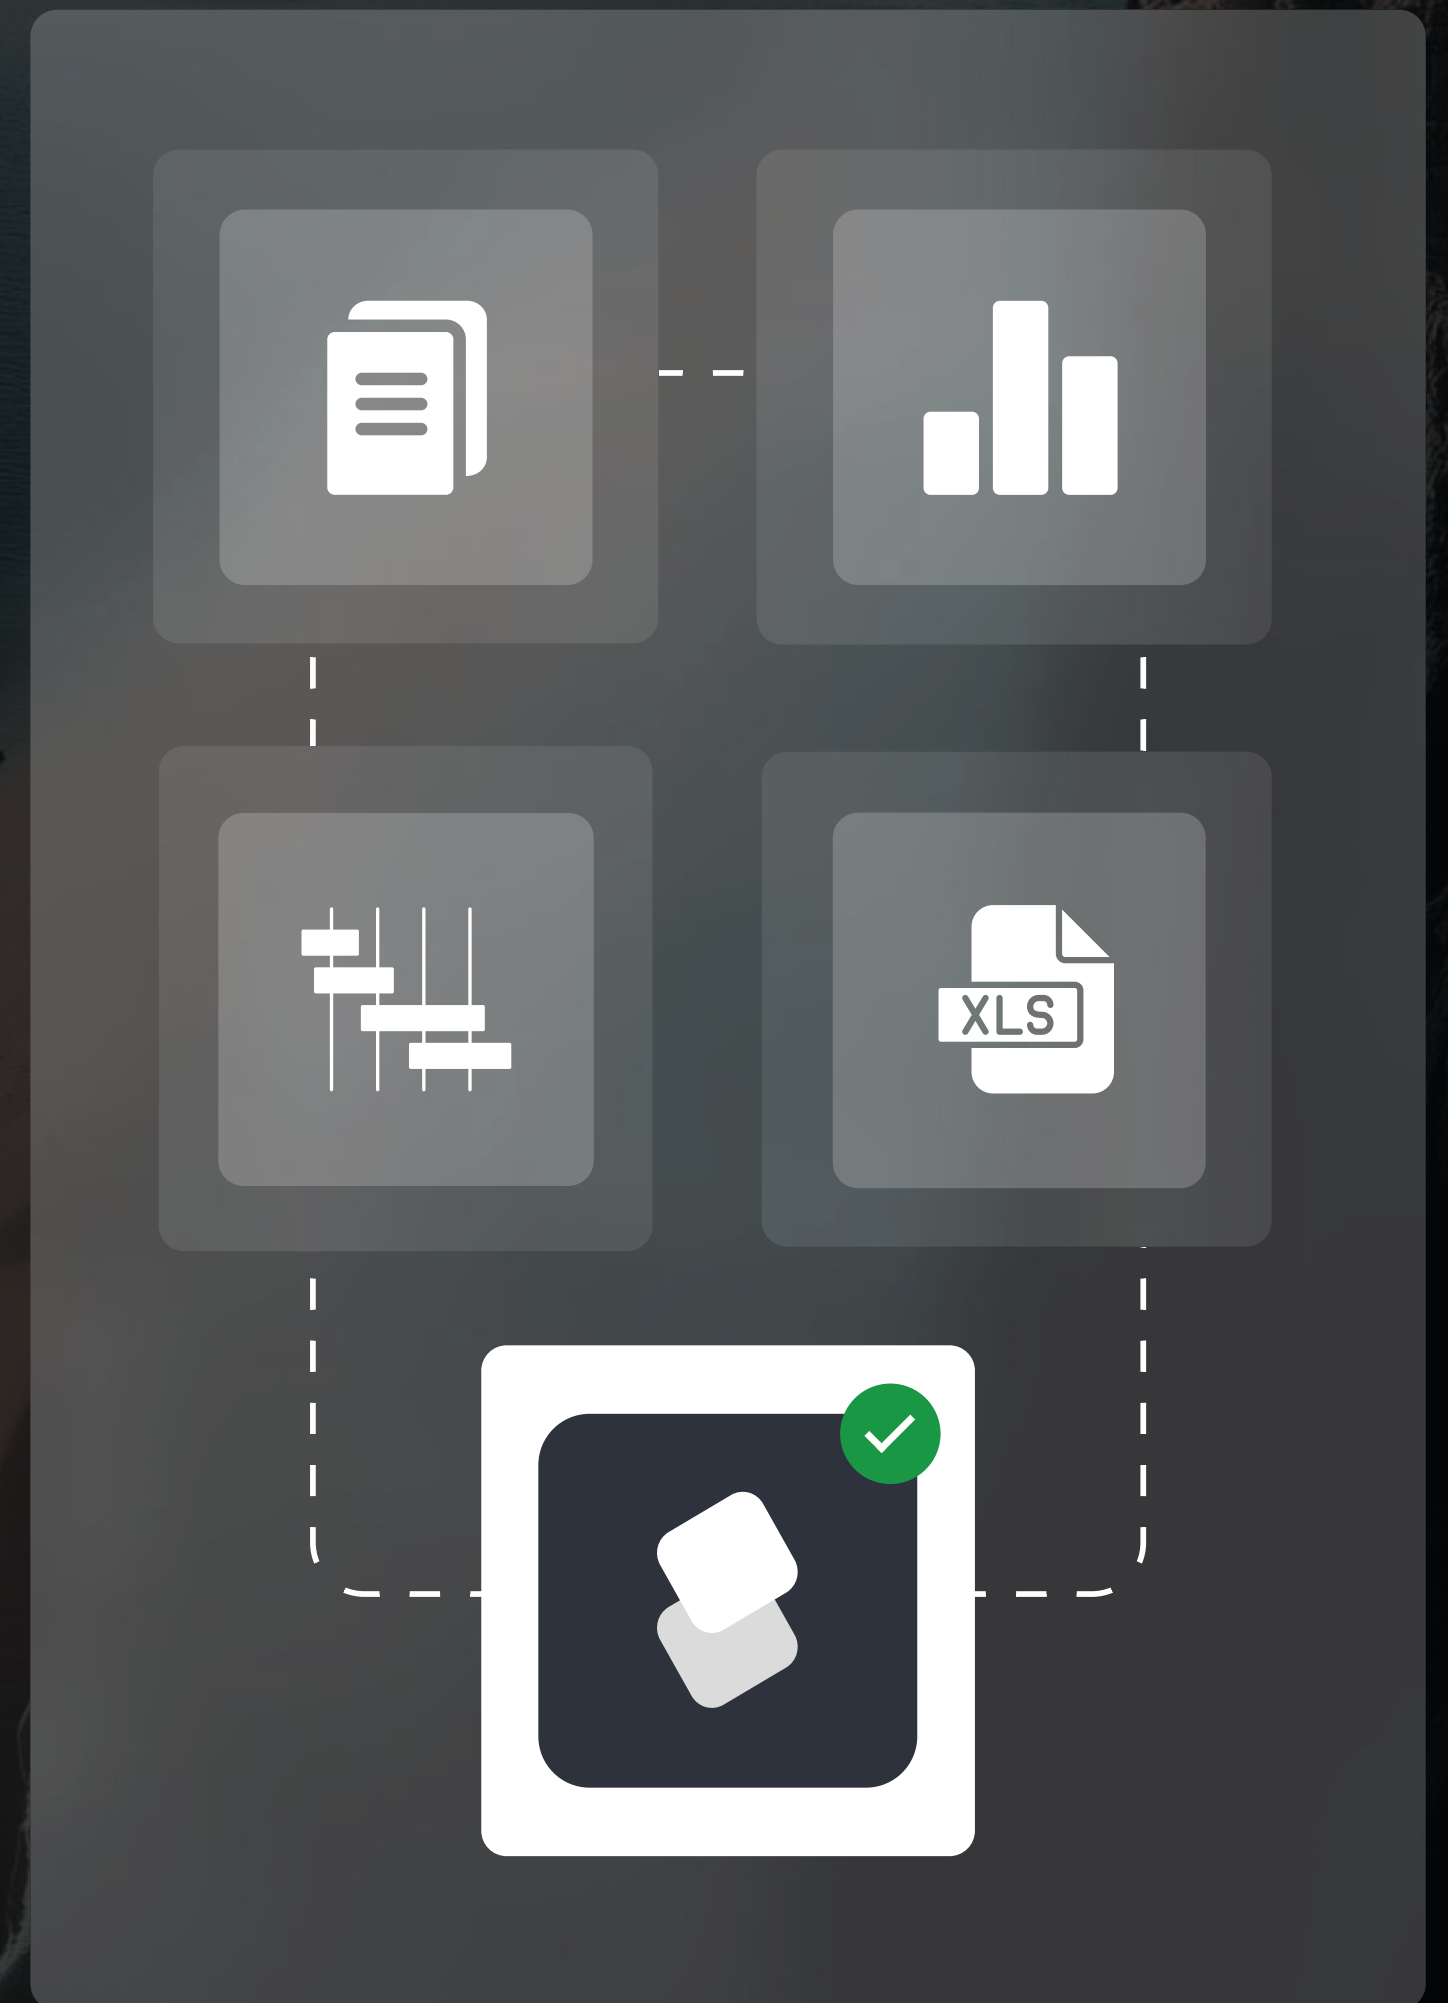

# Introduction to assimil8

assimil8 is an award-winning data consultancy with nearly two decades of experience in transforming raw data into strategic decisions.

Our mission is to help businesses unlock the full potential of their data, providing actionable insights and strategies that drive growth and innovation. Our services span across various sectors including retail, healthcare, finance, and manufacturing. We provide comprehensive data strategies, from initial data assessment and gap analysis to solution design, implementation, and ongoing support.

This ensures businesses can optimise their data usage, improve decision-making, and drive growth. In the retail sector, for example, our data analytics solutions help optimise pricing, inventory management, and customer experience, leading to increased sales and customer satisfaction. In healthcare, our data analytics services have been shown to reduce patient wait times by 30%, enhancing both efficiency and patient outcomes.

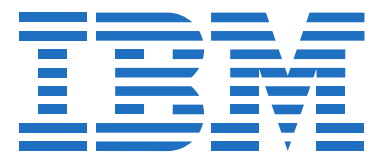

At assimil8, we pride ourselves on our tech-agnostic approach, which allows us to recommend the best solutions tailored to each client's unique needs. We do not push specific products; instead, we focus on finding the most effective and efficient tools and technologies for your business.

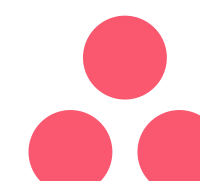

# Introduction to assimil8

## The tools we can work with

+ many, many more

# Overview of Data Workshops

assimil8's data workshops involve a detailed, on-site analysis by our experts who examine a business's data management systems, including hardware, software, and security. These workshops are designed to identify inefficiencies and provide bespoke solutions to optimise data usage and management. During these workshops, our team evaluates your data infrastructure comprehensively. We assess how effectively your data flows, the efficiency of your existing tools, and the robustness of your data security measures.

By examining these components, we can uncover hidden inefficiencies and recommend tailored solutions that align with your specific business needs. This approach ensures that our suggestions are practical and directly applicable to enhancing your data management practices, ultimately leading to improved operational efficiency and data-driven decision-making.

## Benefits of Having a Data Workshop:

### Expert Analysis

Comprehensive review of your data systems by seasoned professionals.

### Customised Solutions

Tailored recommendations to enhance data management and decision-making.

### Efficiency Improvements

Identify and rectify inefficiencies in your data processes.

### Enhanced Security

Improve data security measures to protect sensitive information.

# Solutions Provided by assimil8

01

## Dashboard Creation

We develop customised dashboards for real-time data monitoring. These dashboards are designed to provide intuitive, interactive visuals that transform complex data into easy-to-understand insights, helping businesses make informed decisions quickly and efficiently.

03

## Bespoke Tools

Our team builds bespoke tools tailored to specific data tracking needs. These tools are designed to integrate seamlessly with existing systems, providing businesses with the functionality they need to track and analyse data effectively.

03

## Toolset Alignment

We provide a comprehensive suite of tools to streamline data alignment. By aligning your toolsets effectively, we ensure that all your data processes work together smoothly, reducing redundancies and significantly improving overall efficiency in data management.

04

## Strategic Advice

Our experts offer strategic advice on controlling and optimising data usage. We help businesses develop and implement comprehensive data strategies that enhance data governance, improve data quality, and ensure compliance with industry regulations and standards.

## Case Study – Transforming Reporting Processes at Pelsis

Pelsis, a leading company in the pest control sector, faced significant challenges with their manual reporting processes. These processes were time-consuming and resource-intensive, diverting valuable time away from strategic business activities. assimil8 provided an innovative solution that transformed Pelsis' reporting workflow, resulting in substantial efficiency gains.

### What we did:

- ✓ Implemented an automated Excel Bundle solution to streamline and expedite the reporting process.
- ✓ Enabled analysts to focus on more strategic areas of the business, driving growth and innovation.
- ✓ Reduced the manual effort involved in reporting by 50%, lowering the time analysts spend on data compilation.
- ✓ Provided a scalable solution that can grow with the company, supporting future data management needs.

“The automated Excel Bundle solution from assimil8 has cut our manual reporting process by 50%, allowing our analysts to focus on other strategic areas of our business.”

# Why choose assimil8?

## Proven expertise with a personal touch

At assimil8, we combine nearly two decades of data consultancy experience with a genuine commitment to understanding your unique challenges.

Our journey from a two-person team to a global entity means we've faced and overcome many of the same challenges you encounter. This blend of expertise and empathy ensures that our solutions are not just technically sound but also tailored to your specific needs.

## Tech agnostic approach for genuine solutions

Unlike many consultancies tied to specific products or platforms, assimil8 is proudly tech-agnostic.

Our primary goal is to find the best solution for you, not to push a particular product. This unbiased approach ensures that the strategies and tools we recommend are genuinely aligned with your business objectives, offering real-world value and results.

## Comprehensive in-house team

With assimil8, you're not just getting a consultant; you're gaining access to a diverse team of designers, developers, data scientists, and engineers.

This in-house expertise means we can craft bespoke solutions for any challenge, ensuring seamless integration and a holistic approach to your data needs. Our team's breadth and depth of skills set us apart, making us a one-stop shop for all your data consultancy needs.
